

ASSIGNMENT - 1

Q) Create one form with and apply css for that

Html file:

```
<!DOCTYPEhtml>
<html>
<head>
  <title> First Login bro!! </title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <div>
    <form>
      <h3 class="input heading"> LOGIN </h3>
      <label for="user">User ID:</label>
      <input class = "u" type = "text" id = "user" name = "user"
placeholder = "Enter the userid"><br><br>
      <label for="user">Password:</label>
      <input class = "p" type = "text" id = "password" name = "password"
placeholder = "Enter the password"><br><br>
      <input type = "button" value = "Submit"><br>
    </form>
  </div>
</body>
</html>
```

Css file:

```
body {
  margin: 0;
  padding: 0;
  background: url(backgroundf.webp);
  background-size: cover;
}
div {
  text-align: center;
  position: absolute;
  top: 45%;
  left: 50%;
  background-color: white;
  transform: translate(-50%,-50%);
  width: 350px;
  padding: 15px;
  border: 5px solid green;
}
input[type="text"] {
  text-align: center;
}
```

Output:
